

ASMITA G V

Bengaluru, India | +91 9148719086 | gujjarasmita@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Computer Science and Engineering graduate with 9 months of internship experience in software and full-stack development. Built REST APIs, database-driven systems, production web applications and AI-enabled workflows using Python/Django, Java/Spring Boot, SQL and modern web technologies. Experienced across backend, frontend, databases, testing and deployment.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript, C

Backend & APIs: Django, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, REST APIs, GraphQL

Frontend: Next.js, React, HTML5, CSS3, Tailwind CSS

Databases & Platforms: PostgreSQL, MySQL, SQLite, Hasura, Nhost

DevOps & Tools: Docker, Kubernetes, Git, GitHub Actions, Linux, Maven, JUnit 5, Mockito, Cloudflare, Vercel

EXPERIENCE

Software Development Intern

Jun 2026 – Sep 2026

Arcanelinx Interface & Intelligence Private Limited | Bengaluru

- Developed and enhanced production web applications using Next.js, React and TypeScript, translating business requirements into responsive features and workflows.
- Implemented forms and enquiry workflows while contributing to testing, debugging, Git/GitHub workflows and Cloudflare deployment.

Python Full Stack Intern

Jan 2026 – May 2026

Skylx Technologies Pvt. Ltd. | Bengaluru | On-site

- Developed backend and full-stack functionality using Python and Django, working with REST APIs, application logic, database operations and debugging.
- Applied hands-on learning to build a role-based Hostel Allocation System with Django, SQLite, Docker and Kubernetes.

SELECTED PROJECTS

Hostel Allocation System

GitHub | Case Study

Python, Django, SQLite, Docker, Kubernetes

2026

- Built a role-based Django application supporting end-to-end hostel allocation workflows, with separate student and administrator interfaces for applications, room allocation and hostel management.
- Implemented database-backed application logic using Django and SQLite, then containerized the system with Docker and extended it to Kubernetes for deployment and application management.

AgentFlow | Multi-Tenant AI Workflow Orchestrator

Live | GitHub

Next.js, TypeScript, Gemini, GraphQL, PostgreSQL, Hasura, Nhost

2026

- Built a multi-tenant workflow platform with asynchronous execution, conditional routing, human-approval pause/resume and Gemini-powered workflow steps.
- Implemented organization-scoped authorization, PostgreSQL-backed state, retries, secure webhooks, quota accounting and live GraphQL updates.

Digital Wallet & Transaction Service

GitHub

Java, Spring Boot, Spring Security, JWT, PostgreSQL, Docker

2026

- Built a Spring Boot backend with JWT authentication, role-based access, balances, deposits, transfers and paginated transaction history.
- Implemented atomic transfers using Spring @Transactional, JPA/Hibernate, BigDecimal, PostgreSQL and optimistic locking.

EDUCATION

B.E. Computer Science & Engineering

2022 – 2026

Channabasaveshwara Institute of Technology, Tumkur

CGPA: 8.38/10

TECHNICAL TRAINING & CERTIFICATIONS

Java Spring Framework, Spring Boot, Spring AI – Gen AI

Telusko / Udemy | Sep 2026

100 Days of Code: The Complete Python Pro Bootcamp

Udemy | Oct 2024

Full Stack Developer Bootcamp – Master Frontend to Backend

GeeksforGeeks | Sep 2024

LEADERSHIP

BUILDATHON-2K25 | National-Level Hackathon: Led planning, technical coordination and end-to-end execution for a national-level hackathon with 400+ participants.
