SUMMARY

Computer Science and Engineering graduate with internship and project experience in backend and full-stack development, AI workflows, cloud deployment and cybersecurity. Proficient in Python, Django, REST APIs, SQL, TypeScript, Docker and Kubernetes, with hands-on experience building and deploying web applications and AI-powered systems.

EXPERIENCE

Python Full Stack Intern | Skyllx Technologies Pvt. Ltd., Bengaluru

Jan 2026 – May 2026

- Gained hands-on experience in Python and Django-based full-stack development, working with backend functionality, REST APIs and application debugging.
- Applied the concepts learned during the internship to build a Django-based Hostel Allocation System, extending the project with Docker and Kubernetes deployment.

EDUCATION

Channabasaveshwara Institute of Technology

2022 – 2026

B.E. in Computer Science and Engineering · Tumkur, India | GPA: 8.38/10

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C, SQL

Frontend: Next.js, React, HTML5, CSS3, Tailwind CSS

Backend & APIs: Django, REST APIs, GraphQL, Hasura, Nhost

Databases & Cloud: PostgreSQL, MySQL, SQLite, Cloudflare D1/R2, Cloudflare Workers, Vercel

DevOps: Git, GitHub Actions, Docker, Kubernetes, Linux

AI & Security: Gemini API, LLM Integration, Generative AI, Splunk SIEM, SPL, Nmap

SELECTED PROJECTS

AgentFlow – Multi-Tenant AI Workflow Orchestrator

[GitHub](#) | [Live](#)

Next.js, TypeScript, Nhost, Hasura, PostgreSQL, GraphQL, Gemini

- Built a multi-tenant AI workflow engine with 6 node types, 4 trigger modes, conditional routing, approval pause/resume and live GraphQL execution updates.
- Implemented organization-scoped RBAC, retry handling, quota accounting, secure webhooks and protected workflow operations.

Arcanelinx Corporate Website

[Live](#)

Next.js, React, TypeScript, Cloudflare

- Designed and developed a responsive corporate website for an industrial automation company using Next.js, React and TypeScript.
- Built a guided quotation workflow, validated contact forms, downloadable company profiles and SEO metadata to support lead generation and discoverability.
- Configured GitHub Actions for automated build validation and deployed the production website on Cloudflare with responsive, performance-focused layouts.

Hostel Allocation System

[GitHub](#)

Python, Django, Docker, Kubernetes, SQLite

- Built a Django hostel management system with student/admin roles, application workflows, room allocation and administrative dashboards.
- Containerized and deployed the application on Kubernetes/Minikube using Deployments, Services, health probes and replicas, with Docker for reproducible environments.

Phishing & Cyber Defense Evaluation System

Splunk SIEM, SET, Apache, Splunk Universal Forwarder

- Built an ethical phishing simulation and cyber-defense evaluation environment using SET, Apache and Splunk SIEM.
- Forwarded Apache logs to Splunk and developed SPL queries for centralized event analysis and threat-detection evaluation.

CERTIFICATIONS

Generative AI Leader Track (Google Cloud) · **AI & ML Data Science Bootcamp** (Udemy) · **Foundations of Cybersecurity** (Coursera) · **100 Days of Code: Python Bootcamp** (Udemy) · **Full Stack Developer Bootcamp** (GeeksforGeeks)

LEADERSHIP & ACTIVITIES

Led **BUILDATHON-2K25**, a national-level hackathon with **400+ participants**, overseeing event planning, technical coordination, and end-to-end execution.
